

How to use and create User Account for URKUND

INFLIBNET has been providing, URKUND anti plagiarism software to UGC funded Universities in India since 2015 onwards. URKUND offers a fully-automated system for handling plagiarism. In short, the students send their documents to their teachers by e-mail. Along the electronic route between student and teacher, the documents are checked against three central source areas: Internet, published material and student material. If any document displays similarities with the content in the three sources, the system will flag it for possible plagiarism. An analysis overview is generated and sent by e-mail to the teacher concerned. The analysis overview presents in a simplified form the information needed by the teacher in order to determine if plagiarism has occurred.

JNU faculty members who don't have User ID /Password for the same may send their request to Dr. Manorama Tripathi , University Librarian, JNU at his email ID manoramatripathi2@yahoo.com, librarian@mail.jnu.ac.in.

Students/Researcher want to check their contents using URKUND may send the softcopy of their Research Article/Dissertation/Thesis etc as an attachment to librarian.jnu@analysis.arkund.com. Report once generated will be mailed back in their email ID.

To know how to use URKUND click here. <http://www.arkund.com/en/support>
